# AWIS

## Focused on Wildland Fire Dedicated to Service

As fire management personnel catch a few long deserved "Z"s, award winning, world class geo-intelligence is gathered from AWIS aircraft high above the fire and delivered electronically, before the plane even touches down! The information is then used to create and support strategic, tactical and safety decisions involving often millions of dollars worth of values at risk, equipment and resource services each day.

- Level 3 ortho-rectified thermal infra-red imagery and GIS spatial data on every mission
- Realtime transmission from aircraft sat-com on every mission
- Automated processing, interpretation, delivery
- 2000+ operational AWIS flight hour experience
- 2 planes, redundant systems
- Night or daytime operations
- Full time professional staff dedicated to wildfire 24/7

*Have a safe and rewarding  
Fire season 2004!*
